Application

The Deposit Compact is an extremely compact machine designed to accept cash deposits. It can be used wherever stocks of coins and banknotes need to be deposited and safeguarded quickly and simply. The unit exclusively uses components that are manufactured by leading technology companies and that satisfy the demanding requirements for continuous operation.

Overview of equipment

- **Banknote validator**
Accepts €5.00 to €500.00. The machine allows bundles of up to 50 banknotes to be deposited. If two banknote validators are used the quantity of banknotes that can be deposited doubles. The banknote cashbox is sealed and replaceable and holds 2,000 or 4,000 banknotes.
- **Coin deposit unit**
Accepts and checks coins from €0.01 to €2.00 and automatically fills/transfers the coins into 7 safe bags with a max. capacity of 12 kg each.
- **Industrial PC**
To allow maintenance-free continuous operation, the PC is not equipped with a fan or hard drive. The uninterruptible power supply (UPS) ensures that data is backed up in the event of a power cut.
- **EasyNetCash application**
Features a graphical user interface that can also easily be accessed remotely using a Web browser. Option to connect to existing back-office applications available on request.
- **7" TFT colour touchscreen display**
For simple interactive user navigation.
- **Internal thermal printer**
Documents all deposits using a transaction number (TAN) and/or barcode.
- **Security features against break-in**
 - ▶ Housing made from 3 mm sheet steel
 - ▶ Double-wall front doors with strong 9-point lock
 - ▶ Double-locking system (enables the "dual control principle"), locks by means of cylinder lock and closing lever, optional with electronic combination lock
 - ▶ Electronic alarm system (optional)
 - ▶ Technology and cash can be accessed via two separate doors
